Guardmaster Safety Relays

Innovative technology in a broad portfolio of safety control solutions

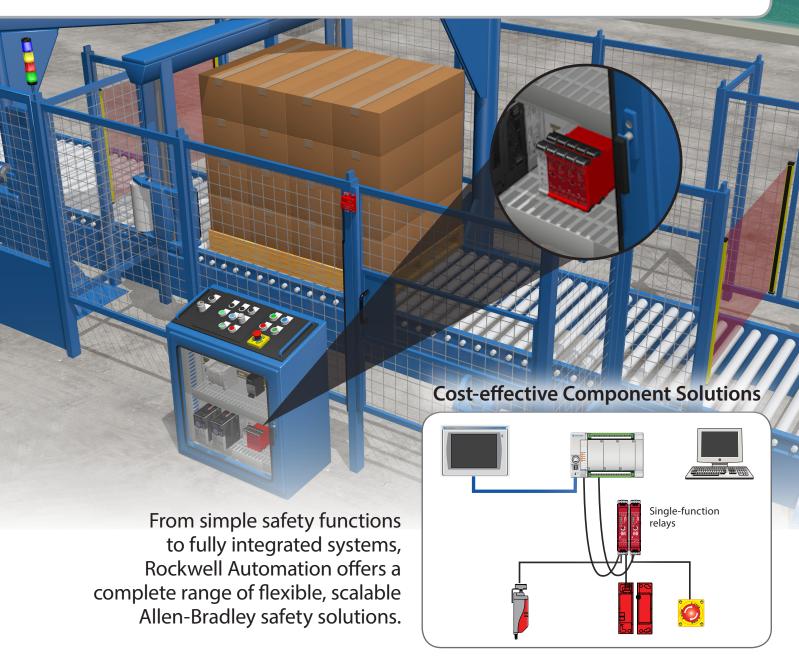

Guardmaster Safety Relays

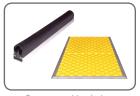

Allen-Bradley® Guardmaster® Safety Relays from Rockwell Automation check and monitor a safety system and either allow the machine to start or execute commands to stop the machine or control safety-related functions. Single-function safety relays are the most economical solution for smaller machines where a dedicated logic device is needed to complete the safety function. Modular and configurable safety relays are preferred where a large and diverse number of safeguarding devices and minimal zone control are required.

Welcome to the Next Generation of Safety Relays

The new family of Allen-Bradley Guardmaster Safety Relays from Rockwell Automation includes eight units capable of monitoring a broad range of safety devices in a variety of applications. These eight units can achieve most of the functions safety systems require, helping simplify purchasing and parts management. The family is designed to meet new functional safety standards, such as ISO 13849-1 or IEC 62061 and offers key functions to simplify installation and system complexity.

Guardmaster 440R-ENETR EtherNet/IP Network Interface

The Guardmaster EtherNet/IP™ Network Interface (440R-ENETR) allows Guardmaster Safety Relays with embedded optical bus technology to seamlessly communicate on an EtherNet/IP network. The information gathered from the GSR intelligent safety relays by way of the EtherNet/IP Interface helps minimize unplanned downtime and increase efficiencies for startup.

- Compliant with ODVA requirements for linear, star, and ring EtherNet/IP network topography
- Connects up to six Guardmaster safety relays on a single network interface
- Easy-to-use, compact solution

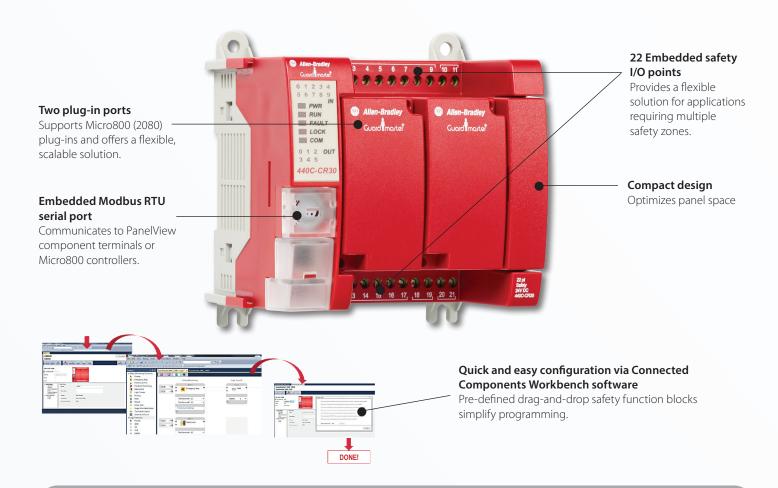

Cat Number	Description				
440R-ENETR	Guardmaster Ethernet/IP Network Interface				
Supported Guardmaster Safety Relays					
440R-D22R2	Guardmaster DI				
440R-D22S2	Guardmaster DIS				
440R-EM4R2	Guardmaster EM				
440R-EM4R2D	Guardmaster EMD				
440R-GL2S2P	Guardmaster GLP				
440R-GL2S2T	Guardmaster GLT

Software Configurable Safety Relay

The Allen-Bradley Guardmaster 440C-CR30 Safety Relay is a flexible, cost-effective and easy-to-use configurable safety relay ideal for applications requiring 4 to 9 safety circuits and control of up to 5 zones.

Connected Components

Connected Components Workbench™ software is specifically designed to help you meet today's requirements through a range of application-based control solutions.

The Connected Components solution provides a design toolkit, programming software and the products to help create a safety and standard control solution including:

- Micro Controllers
- Configurable Safety Relays
- Operator Interface
- Drives and Contactors

This bundled approach helps you more quickly design and develop machines.

Explore the capabilities of our Guardmaster 440C-CR30 Software Configurable Safety Relay by viewing the Virtual Brochure on ab.com.

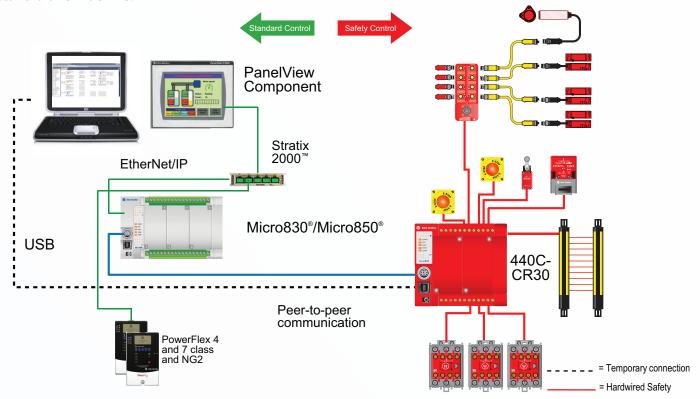

Scan to learn more about safety relays on ab.com.

Mix Safety and Standard Control

Although the 440C-CR30 Software Configurable Safety Relay is a cost effective and easy-to-use solution for safety applications, it can also be used seamlessly with standard control non-safety products.

The Guardmaster 440C-CR30 Software Configurable Safety Relay combined with Micro800™ controllers, PowerFlex® drives and PanelView™ component operator interface products offer a core solution for your stand-alone machine.

Specifications				
CATALOG NUMBER	440C-CR30-22BBB			
Communications ports, embedded	USB 2.0 (non-isolated) RS232 non-isolated serial			
Base Programming Port	USB 2.0 (non-isolated) Any standard USB printer cable will work			
Base digital I/O points (see Types and Number of Inputs/Outputs)	22			
Base number of plug-in modules	2			
Maximum digital I/O ⁽¹⁾	38			
Types of plug-ins supported	2080-IQ4OB4, Digital 4 Inputs, 4 Outputs 2080-OW4I, 4 Relay Output 2080-OB4, 4 PNP Source Output 2080-IQ4, 4 Digital Inputs 2080-MEMBAK-RTC Memory Module			
Power supply	Embedded 24V DC power supply, optional external 120/240V AC power supply available			
Software	Connected Components Workbench			

І/О Туре	Number
Input Only (24V DC Sink)	10
Input Multi-Purpose Terminal: Input (24V DC Sink) Single-Wire Safety Input	2
Multi-Purpose Terminal: Input (24V DC Sink) Test Output Output (24V DC Source)	6
Output Only (24V DC Source)	2
Output Multi-Purpose Terminal: Output (24V DC Source) Single-Wire Safety Output	2

⁽¹⁾ The number of maximum digital I/O assumes 8-point digital I/O plug-ins (for example, 2080-IQ40B4) are used on all available plug-in slots. Standard digital inputs can only be used for non-safety rated diagnostics and control such as resets, muting sensors or external device monitoring feedback circuits.
