Kübler worldwide

The Kübler Group is a worldwide leading and strongly growing family-run company with four production sites, eleven subsidiaries and strong agents in more than 50 countries.

Kübler always focuses on understanding the application of the customer. This results in suitable products and solutions. So trust in a technically well-founded advice and benefit from a lasting application support. Over 480 persons are working all over the world for Kübler and pursue one goal: inspire their customers!

Our Pulses for Innovations

The Kübler Group belongs today to the leading specialists worldwide in the fields of position and motion sensors, functional safety, counting and process technology and transmission technology.

Founded in the year 1960 by Fritz Kübler, the family business is now led by the next generation of Gebhard and Lothar Kübler.

Eleven international group members and distributors in more than 50 countries offer local product know-how, service and advice throughout the world.

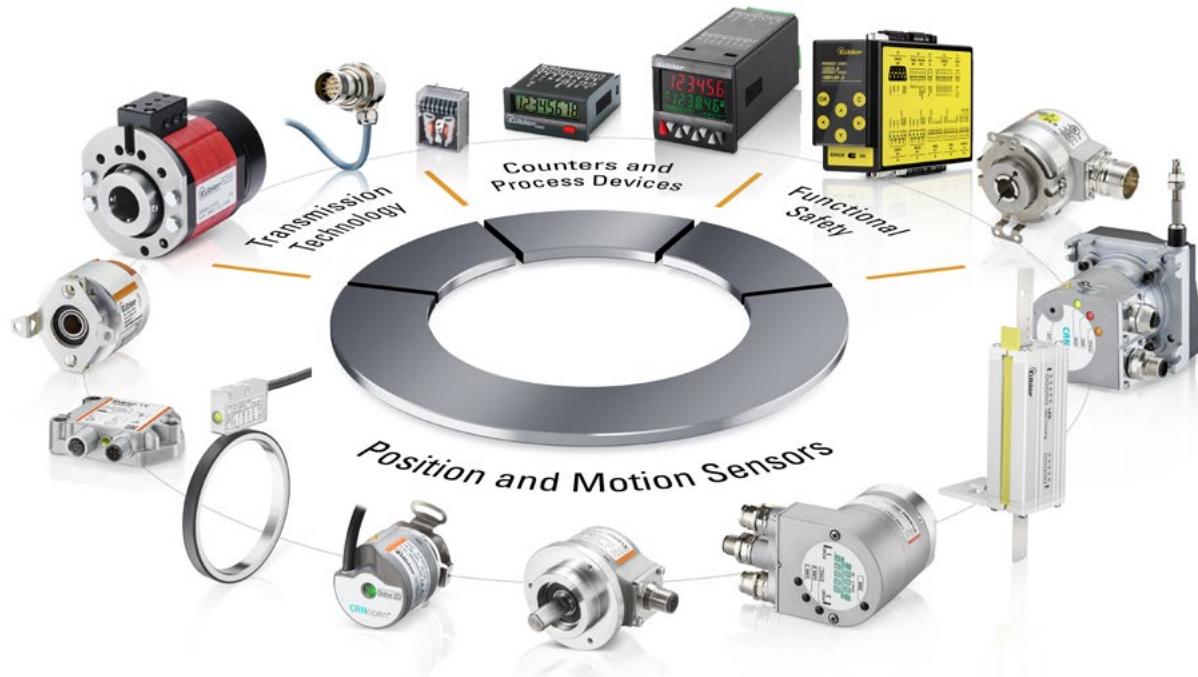

Innovative product and sector solutions, as well as solutions for functional safety and a high level of service, are the reasons behind our global success.

The strict focus on quality ensures the highest levels of reliability and a long service life for our products in the field.

Over 480 dedicated people worldwide make this success possible and ensure that customers can continue to place their trust in our company.

Our Product Portfolio

Position and Motion Sensors

- Incremental and absolute encoders
- Motor Feedback Systems
- Bearingless encoders
- Shaft copying systems
- Linear magnetic measuring systems
- Draw-wire encoders
- Inclinometers
- Connection technology

Transmission Technology

- Slip rings, modular system
- Slip rings, bearingless modular system
- Slip rings, contactless transmission
- Slip rings, compact and low-maintenance
- Slip rings, Ethernet transmission
- Slip rings, High Current
- Optical fiber signal transmission modules
- Cables, connectors and pre-assembled cordsets

Functional Safety

- Certified incremental and absolute encoders
- Certified explosion-protected encoders ATEX / IECEx
- Modules for safe drive monitoring
- Safe fieldbus gateways
- Safe speed monitors
- Adapted service packages
- Connection technology

Counters and Process Devices

- Pulse counters and preset counters
- Hour meters and timers
- Frequency meters and tachometers
- Combination time and energy meters
- Position displays
- Process displays and controllers for temperature, analog signals and strain-gauge
- Setpoint adjuster

We offer Solutions for the following Industries:

The high performance level and reliability of the Kübler products are based on our long experience in these demanding application sectors. Learn more about our application-specific solutions under:

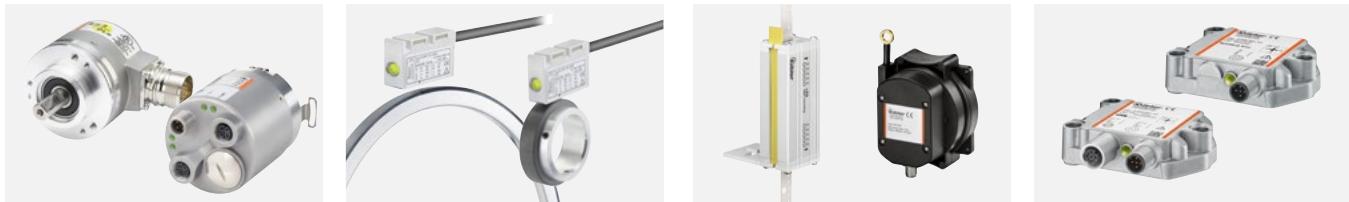

www.kuebler.com/industries

Type: 8-5000 R22
10-30 VDC
S-No: 123456789

Position and Motion Sensors

Already back in 1997 Kübler introduced the first absolute multturn encoder with hollow shaft and an installation depth of only 42 mm – a world first. Constant innovations such as the Safety-Lock™ Design or the first optical electronic multturn stage were to follow this tradition and made new applications and customer solutions possible.

Incremental and absolute singleturn, multturn and fieldbus encoders

Whether with interference-free positioning or controlling in real-time, as a result of their ingenious safety concept, their extremely rugged technology and their compact construction, Kübler encoders make a significant contribution to the reliability of plant and machinery.

Incremental and absolute bearingless encoders

Thanks to their technology, the magnetic bearingless encoders are almost wear-free and at the same time very robust. With their reduced mounting depth of only 10 mm bearingless encoders are particularly compact and can be mounted quickly and easily on shaft diameters up to 390 mm.

Linear measuring technology

Kübler offers a wide range of solutions and technologies for measuring linear positions and motions:

- Shaft copying system
- Draw wire encoders
- Magnetic measuring system
- Length measuring kits

Inclinometers

Kübler inclinometers are naturally suited to use in harsh industrial environments, whether in railway technology, solar installations, commercial vehicles or cranes and hoists. They boast a compact, rugged construction, excellent shock resistance and a high protection rating.

new

Motor Feedback Systems for Servo Motors

Sendix S36

• Compact and robust

Suitable for installation on standard servomotors with an unchanged size of 36 mm only. Mechanical robustness thanks to latest mechanical gear technology, robust bearing structure, reliable connector technology, torque-proof stator coupling and wide temperature range.

• High signal quality

Resolution \leq 2048 ppr SinCos or \leq 24 bits fully digital thanks to Phased Array Sensor Technology.

• All interfaces

An encoder platform with all classical and all open source interfaces for the Single Cable Solution.

• Functional safety

Certified Motor Feedback System, from the sensors, through the mechanics, up to the electrical interface.

Functional Safety

Safety is – not least since the EU Machinery Directive 2006/42/EC – an “integral part of the construction of drives”.

Systems and components for Functional Safety

- Approved SIL3/PLe encoders - absolute and incremental
- Safety modules for safe drive monitoring
- Control solutions for safe processing of safety sensors
- Adapted Service Packages

Incremental encoders

■ Accessories for Position and Motion Sensors

Kübler original accessories are individually adapted to match each particular model. They meet our high quality demands.

Connectors

Cable

Measuring wheels

Couplings

Flange adapters

Bearing units

Spring encoder arm

Displays

Draw-wire accessories

■ Isolation / adapter inserts for hollow shaft encoders

Thermal and electrical isolation of the encoders.

These isolation inserts prevent currents from passing through the encoder bearings. These can occur when using inverter controlled three-phase or AC vector motors and considerably shorten the service life of the encoder bearings. In addition the encoder is thermally isolated as the plastic does not transfer the heat to the encoder.

Tip:

By using these adapter inserts you can achieve six different hollow shaft diameters, all on the basis of one encoder.

Functional Safety

Kübler's extensive product portfolio of rotary and linear position and motion sensors, with the matching safe encoder evaluation devices, provides the basis for safe application-specific drive solutions. However, safe single components alone do not ensure a safe global application. Legally compliant safety already begins when planning the machine, and this is why the Kübler Service technicians and engineers offer a wide range of supports both for the plant manufacturer and for the operator.

Functional Safety

The matter Functional Safety Technology is simplified by the certified encoders of the Sendix SIL family, which includes both incremental, absolute and ATEX / IECEx encoders.

Functional Safety has become an integral part of mechanical engineering.

With a view to machinery Directive 2006/42/EC, Kübler also provides MTTF values for its standard encoders. This allows the user to perform his own calculations in compliance with standard EN ISO 13849-1.

Safety modules

The safe encoder evaluation devices of the Safety-M family include single compact, standalone devices for simple applications as well as modular extendable compact controllers that can be connected via a gateway to any higher-level control system.

This allows realizing flexible safety release circuits integrating a safe speed and position monitoring to achieve simple machine safety. Kübler's technical safety solutions meet all high safety and reliability requirements.

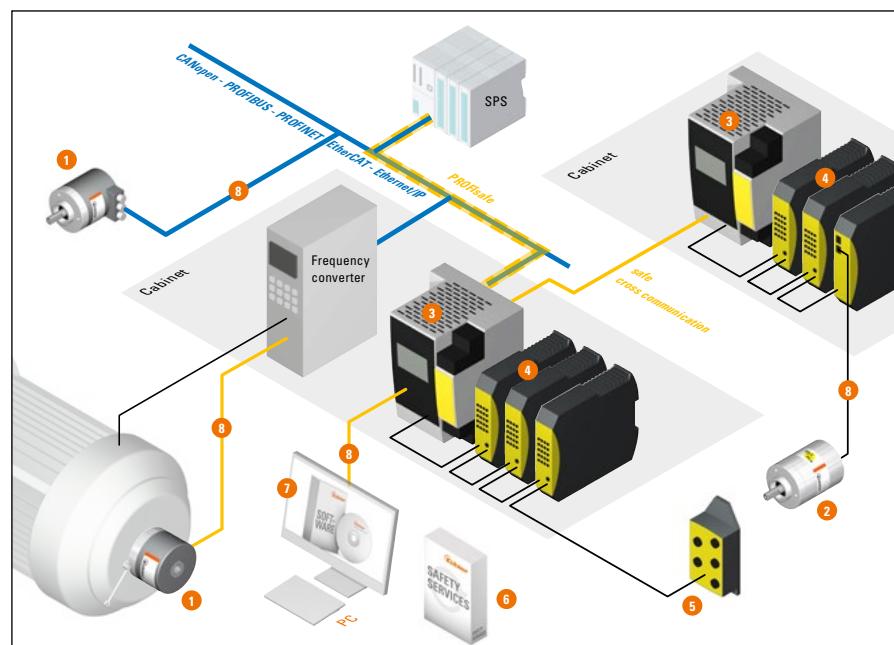

Safety services

Operators of machines or plants can be exposed to increased hazard potentials. These potentials can be mitigated with suitable protective equipment and safety measures.

Safety Services by Kübler will support you with custom-tailored service packages during the whole service life cycle of your machine / plant.

System overview

Software

Transmission Technology

Quality down to the last detail. Our activities are orientated with the focus always on the customer – from the creation of the product right through to final delivery. This high quality extends to every detail, from the connectors to the optical fiber modules.

Slip rings

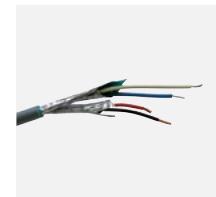

Innovation meets tried and tested product quality and compact dimensions: the new Kübler slip ring generation brings together a number of performance features under one umbrella. The areas of application are many and diverse: from packaging machines, via cranes through to rotary tables, slip rings are able to transmit power, signals or data from a stationary to a rotating platform. Versions for field bus signals such as Profibus or CANopen®, as well as for Ethernet transmission, are available.

Optical fiber transmitter modules

Kübler optical fiber modules solve transmission problems simply, reliably and yet at the same time economically. They reliably convert electrical signals into optical signals – and back again. This technology finds its use wherever electrical signals do not suffice to guarantee a safe transmission of the signals. Or where interference, too large distances or shielding prevent good communication. Even when subjected to extremely strong electro-magnetic fields, Kübler optical fiber modules can transmit signals over distances of up to 2000 metres. With perfect safety.

Signal converter

The signal converter portfolio includes various devices (frequency divider, level converter, signal converters and signal splitters), which adapt signals to most diverse applications.

M12 cordsets with integrated control LEDs

The 8-pin M12 cordset for incremental encoders ensures fast, simple connections under difficult outdoor conditions. The transparent right-angle housing contains three LEDs for displaying channels A, B and Z.

- Monitors all important encoder functions
- Easy troubleshooting
- Installation help for zero point detection

Connectors and cables

The comprehensive choice of cables, connectors and cordsets from Kübler ensures error-free connections and highly accurate transmission. A perfect match for our encoders and counters.

Counters and Process Devices

Successful innovation? A question of corporate culture. In 1960 company founder Fritz Kübler developed the first short time meter with permanent time display. In 2007 Kübler introduced its unique combination meter HW 66, the first in the world to measure both time and energy in one device.

Electromechanical counters

The indestructible all-rounders – from microcounters to standard hour meters. The mature technology platform of the robust counters with electromagnetic drive and mechanical counting drum system is still as up-to-date today as it always was. Due to their low power consumption these counters are ideal for battery operation. Their significant features include – as always – their excellent shock, impact and magnetic-field resistance.

Electronic counters

Have everything that counts. Kübler offers a wide range of counters for pulses, frequency, position and time – all with proven quality. Electronic counters from the house of Kübler boast very high protection levels and require only minimal installation depths. The possibilities when it comes to their areas of application are therefore virtually limitless.

Process devices

Control is better. Kübler process devices reliably display and control their process values such as temperature, analog signals (0/4 ... 20 mA, 0/2 ... 10 V) or pressure – with linearization functions with up to 16 control points. Here the Codix name guarantees the concept of simple, unified operation. The Kübler process technology portfolio includes process and temperature displays, process, temperature and strain-gauge control devices and setpoint generators.

Kübler Codix

The Kübler Codix brand name stands for universal usability and standard dimensions, as well as for the philosophy of simple menu-driven programming of our latest counter generation.

At the centre of the sophisticated technology lie the large, easy-to-read LED or LCD displays and the intuitive operation, which we also offer with text menu programming. The high quality plug-in screw terminals make a significant contribution to the fast, user-friendly start-up.

- Very bright LED display
- High contrast LCD display
- Robust housing
- High IP protection
- Simple, unified programming
- Fast count and frequency inputs

Kübler Codix

With Codix:

The fastest way to get started ... no need for a manual

CODIX sets new standards when it comes to user-friendliness.

- Help text as running text
- Easy-to-read 14-segment LED 6-digit display
- Simple programming via 4 keys on the front
- One front key as well as 2 additional inputs can be programmed for specific applications
- Practical quick-start guide for setting the parameters and operating the device. The guide can be affixed directly to the front of the unit and can be removed and re-applied as required.

i Accessories for counters and process devices

Although little remains to be added – within the comprehensive range of accessories you can still find many more ideas to adapt Kübler counters and process displays exactly to your requirements.

DIN-rail adapters

Bezel adapters

Sealing covers

Socket boxes

Mounting fixtures and supports

Software

Blind enclosures

Sealing gaskets

i Codix with analog output

The Codix devices with analog output can scale the measured values accordingly and convert them into a different analog standard signal (0 ... 10 VDC; 2 ... 10 VDC; 0 ... 20 mA; 4 ... 20 mA) to transmit them to a higher-level controller or send them to a curve tracer or large display. It is possible to transmit the current measured value in addition to the minimum or maximum values as well as the total value.

Together with the 2 output relays simple local control tasks can be undertaken – quite simply, without the need for programming knowledge, with direct display for user-friendly control on site.

i Codix with serial interface

The Codix devices with serial interfaces enable uncomplicated read-out or write of all important values in the device for monitoring and control purposes. Connection of large displays and printers can also be executed simply and without problem.

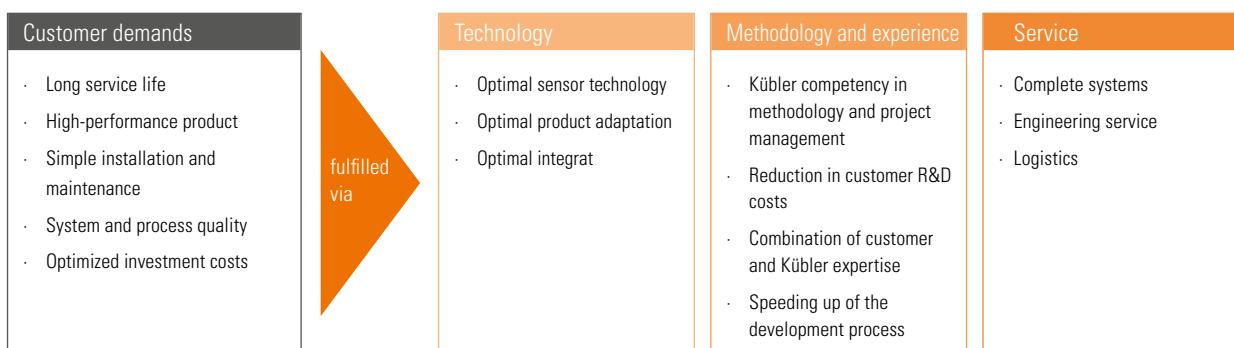

Furthermore, the interface permits parameter and other settings of the display to be stored or transmitted quickly and easily to a number of devices. Several devices with various measuring tasks can be networked together in order to monitor complete operating or process tasks. The Codix devices offer the standard RS232 and RS485 interfaces – the standard Modbus and CR/LF protocols have already been implemented for the Codix 560.

Tailor-made solutions – Kübler Design System

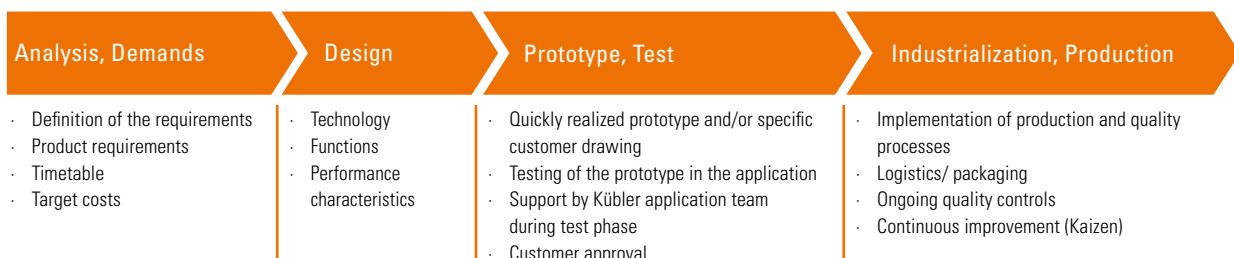

With the KDS method our customers receive a lasting solution to lowering costs, reducing the number of models available or eliminating quality deficiencies. With KDS we develop product and engineering solutions together. The method stands out because of its structured process; this delivers innovation through experience and cooperation with the customer.

Gebhard and Lothar Kübler, Managing Directors Fritz Kübler GmbH

The Kübler Design System – satisfying customer demands

The 4 phases of the Kübler Design System

Kübler Service for Planning Dependability

Fast, reliable service and professional advice have top priority at Kübler. We are globally on your doorstep in 8 service and application centres and offer our customers planning dependability. Our processes and services are certified and are constantly being improved.

24one 24one delivery promise

Manufacturing in 24 hours. For orders placed on working days before 9 AM, the product will be ready for dispatch on that same day. 24one is limited to 20 pieces per delivery.

Sample Service

We manufacture samples of special designs or according to customer specification within shortest time.

10 by 10

We will manufacture and deliver 10 encoders within 10 working days (365 days a year - with the exception of 24th Dec. until 2nd Jan.)

Technical Support

Kübler' applications team is present on site all over the world for advice, analysis and support.
